

## Audio Visual Setup for Dr. Tieraona Low Dog, M.D.

Laptop Computer: Dr. Low Dog prefers to use her own Laptop for presentations because it supports PowerPoint and it's "Presenter Tools". However, many conferences are set up with servers running the presentation and that is acceptable.

Microphone: A wireless Lavalier (lapel) Microphone is preferred. Dr. Low Dog likes to be free to move around while speaking to the audience. A Lavalier microphone with a long cord will work if wireless isn't available.

Projector and Screen: An LCD project with VGA or DVI adapter for PowerPoint presentations.
